

Data Collection and Preprocessing Phase

Date	10 July 2024
Team ID	739970
Project Title	TRAFFICTELLIGENCE-Advanced Traffic Volume Estimation With Machine Learning
Maximum Marks	6 Marks

Data Exploration and Preprocessing Report

Dataset variables will be statistically analyzed to identify patterns and outliers, with Python employed for preprocessing tasks like normalization and feature engineering. Data cleaning will address missing values and outliers, ensuring quality for subsequent analysis and modeling, and forming a strong foundation for insights and predictions.

Section	Description
Data Overview	<pre># used to understand the descriptive analysis of the data data.describe()</pre>

Heat Map

Pair Plot

Box Plot

```
data.boxplot()
```

```
<AxesSubplot:>
```

Outliers and Anomalies
